

“I learned to sail, it was fun and I made friends!” – 2022 Sailing School Student

The results are in! 2022 sailing school students filled out an online survey* to provide key feedback on their experience with the school.

The results are overwhelmingly positive, and speak to the great work of our instructors. Here are some examples of feedback:

- 97% of students said they hope to return for more sailing lessons
- 94% of students were satisfied or very satisfied with the training they were provided
- Over 80% of the students described their experience as ‘Fun’ or ‘Exciting’
- 89% of students said that sailing school compares well to other summer camps
- 86% of students would recommend the sailing school to a friend.

Students highlighted that they really enjoyed “going really fast in the wind and learning leadership on the water”, “making new friends and being on the water”, and “being able to experience something I don't normally have access to”.

These positive results and feedback are especially impressive given that only a third of the students had spent time in sailboats before going to sailing school.

Information was also gathered to learn about areas to improve and about how students had heard about the sailing school.

- Areas to improve included more time on the water, more camps, and more games.
- Students heard about the sailing school from a range of sources, including past participants, friends, parents, and the Exchange.

These results can help us to improve the program and plan our communications and reach-out as we look to kick off the 2023 season!

*36 students filled out the survey.
