

Septic System Upgrade Update. 27 August 2023.

We are planning on the Contractor mobilizing on the 5th September, with excavating starting on the 6th. As mentioned in a previous update, this is going to be disruptive, and I would caution everyone transiting the property while the work is ongoing to take great care and be aware of the operation of the heavy machinery and trucks moving around the property.

The bottom parking lot will be used as a staging area and Bob Jones will be sending out notification on when the closure will take place. **Please do not park in the lower lot and leave on a cruise!** If there are any unclaimed vehicles left in the lot, we may have to have them towed.

Power and water to the docks will be cut off, for safety reasons, while trenching takes place for the new sewer line, and electrical and air lines. Hopefully, these will not be off for too long, although we are at the mercy of Hydro for the reconnecting of the power.

Water to the clubhouse will be cut-off until the new system is up and running – approximately three weeks. There will be two Porta-Potties on site while the installation is ongoing.

The club reciprocal page has been updated to include a message advising visitors that showers and washrooms are not available. Notices have also been placed at the gatehouse and kiosk on the breakwater.

I would ask for your patience while this important project is undertaken.

Pete McGovern

Project Lead.
